PROJECT REPORT

TITLE : Online Quiz System

Submitted by :	B. Geethika
Submitted to :	Global Quest Technologies
Date :	20 April 2026

ABSTRACT

The Online Quiz System is a Python-based application designed to conduct quizzes in an interactive and efficient manner. The main objective of this project is to test users' knowledge through a set of multiple-choice questions and automatically evaluate their performance.

This system presents a series of questions with multiple options, allows users to select their answers, and calculates the final score based on correct responses. It also provides feedback at the end of the quiz, helping users understand their performance.

The project is implemented using basic Python concepts such as lists, dictionaries, loops, and conditional statements. It demonstrates how logic and user interaction can be combined to build a simple evaluation system.

Overall, the Online Quiz System provides an easy and effective way to conduct quizzes and can be extended into a full web-based examination system.

Output:

===== ONLINE QUIZ SYSTEM =====

Q1: What is the capital of India?

- A. Mumbai
- B. Delhi
- C. Chennai
- D. Kolkata

Enter your answer (A/B/C/D): B

✅ Correct!

Q2: Which language is used for web development?

- A. Python
- B. HTML
- C. C
- D. Java

Enter your answer (A/B/C/D): B

✅ Correct!

Q3: Who developed Python?

- A. Dennis Ritchie
- B. James Gosling
- C. Guido van Rossum
- D. Bjarne Stroustrup

Enter your answer (A/B/C/D): C

✅ Correct!

Q4: Which is not a programming language?

- A. Java
- B. HTML
- C. Python
- D. C++

Enter your answer (A/B/C/D): B

✅ Correct!

Q5: What is 2 + 2?

- A. 3
- B. 4
- C. 5
- D. 6

Enter your answer (A/B/C/D): B

Enter your answer (A/B/C/D): B

✅ Correct!

===== QUIZ COMPLETED =====

Your Score: 5 / 5

Percentage: 100.0%

🏆 Excellent!
